

## INSTRUCTIONS FOR BUS DRIVERS

The Science Barge is located in downtown Yonkers, at the end of Dock Street on the Hudson River. We are located behind the Yonkers Train Station. The Train Platform is high enough for buses to safely pass under. Please see the following map. **This whole area is under new construction and some of the streets may not correctly show on Mapquest, or Google Maps. If you do want to run a search on Google Maps, enter 99 Dock Street Yonkers, NY 10701.**

We are trying to be good neighbors, so if you could follow our route, we would appreciate it. **Note: there is construction now at Wells Avenue and the road is closed.** It is also difficult for buses to turn around at Dock Street. During this time, please **go under the Metro North underpass at River St. and Wells Avenue or Dock St. and Alexander and turn LEFT to proceed to Van der Donck St. (across from back entrance of train station). Use the map below as your guide.** The students can exit onto the sidewalk where Alexander St crosses Dock St and becomes Van der Donck St. This puts your door facing the Science Barge. There is no parking on River Street, and please plan on moving your bus as soon as the youth exit. This will prevent your bus from blocking the park and will keep our neighbors happy.

**To Park.** Proceed South on Van der Donck Street, and then left again on Alexander Street. There is ample street side parking down Alexander Street (near the Beczak Education Center). There are many bus companies in this area, so there is ample turning radius. You can also turn the bus around in the Beczak Environmental Center.

If you need directions during a school visit, please call 914-375-2151 and speak with someone in our office.
